## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 12, and 14 are rejected under 35 U.S.C. 102(b) as being anticipate by Nowotny.

The Nowotny reference discloses a cleaning device comprising a distributing surface (surface of brush A which frame B mounts on), a fluid line K, a profile/spray strip I, openings J, fasteners E, and a cleaning implement (see brush bristles in Figures).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nowotny in view of Garcia.

The Nowotny reference discloses a cleaning device as discussed supra, but does not disclose that the cleaning implement is removably attached via a hook and

loop connection. However, attention is directed to the Garcia reference, which discloses a similar cleaning device wherein the cleaning implement is removably attached via a hook and loop connection (see col. 1, lines 29-37) for convenient replacement of worn cleaning implements. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Nowotny cleaning device so that the cleaning implement is removably attached via a hook and loop connection in view of Garcia for convenient replacement of worn cleaning implements.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nowotny.

The Nowotny reference discloses a cleaning device as discussed supra, but remains silent as to the spray strip material. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to fabricate the spray strip out of plastic since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In *Re Leshin*, 125 USPQ 416.
